## Experience

### TeraHost.ch

#### Cloud Engineer

September 2024 - Present (9 months)

Switzerland

I'm working with Terahost.ch, a startup company, to help them launch their services quickly by leveraging my Cloud Engineering skills. I focus on designing and managing scalable, secure cloud infrastructures, automating deployments with tools like Terraform, and optimizing resource usage to reduce costs. My goal is to provide a reliable, high-performing environment that supports the company's rapid growth and successful launch.

I'm contracted for 6 months to assist with these efforts.

### CaterQ

#### Full-stack Symfony Developer

March 2024 - Present (1 year 3 months)

Zurich, Switzerland

Continuously delivering fresh updates and fine-tuning their current application, while also enhancing server infrastructure to efficiently handle high volumes of traffic.

### GLAMARO

#### Full Stack Developer

January 2024 - Present (1 year 5 months)

United States

Glamaro is a hairstylist app. I am working on it part-time, on an hourly basis, using Laravel, Vue, jQuery, and Flutter.

## CodeManiak

Chief Executive Officer

August 2022 - Present (2 years 10 months)

Kosovo

Our suite of services caters to the diverse needs of modern businesses seeking to establish and optimize their online presence. With our Web Development Services, we design and build tailored websites and web applications, utilizing cutting-edge technologies to deliver engaging user experiences and robust functionality. Our DevOps services streamline the development, deployment, and management processes, enabling faster delivery of software and continuous improvement through automation and collaboration. Additionally, our Hosting services provide reliable infrastructure and scalable solutions to ensure high performance, security, and accessibility for your digital assets. Together, these integrated offerings empower businesses to thrive in the digital landscape by leveraging the full potential of modern web technologies.

## DotComHunt

Founder, Domain Seller

January 2022 - Present (3 years 5 months)

Kosovo

Buying and selling premium .com domains !

## Self employed

21 years

Programmer

2009 - Present (16 years)

Prishtine, Kosovo

Web, Mobile and Desktop Application Development

Computer Service Technician

2004 - 2009 (5 years)

Gjakove

Repair & Troubleshooting

Virus Removal & Security

Data Protection & Recovery

## Wired/Wireless Networking

### Protecht

#### Developer

May 2024 - December 2024 (8 months)

Kosovo

(Short-term) I'm working part-time on an hourly basis with the following technologies: Laravel, Vue, React, and Linux servers.

### Spotify

#### PHP Developer

February 2023 - June 2024 (1 year 5 months)

New York, United States

### Bluesky Travel Agency

#### Software Developer

February 2023 - March 2024 (1 year 2 months)

Kosovo

I worked partially remote for Bluesky Travel Agency, where I developed software solutions to enhance their daily operations, streamline workflows, and improve overall efficiency in their service delivery. I recently wrapped up the software project and have since shifted my focus to new opportunities.

### Evonit

#### Backend, Lead Dev

June 2023 - December 2023 (7 months)

United States

As a Senior Laravel Backend Developer & Technical Lead, I play a pivotal role in driving the development of robust and scalable backend solutions for cutting-edge applications. Additionally, I take charge of managing and mentoring cross-functional teams, including Android and iOS developers, ensuring seamless integration and exceptional user experiences.

### CloudManiak

#### Founder

October 2022 - May 2023 (8 months)

Kosovo

For many years, I had the opportunity to work on numerous websites that faced critical issues due to cyber attacks. My responsibilities encompassed various tasks such as identifying cyber attacks, removing malicious code from servers, and restoring services to ensure proper operation. I prioritized

reassuring customers that their systems were secure and preventing unauthorized access by external hackers.

In addition to my incident response work, I conducted comprehensive analysis of cyber attacks by setting up simulated services on the Internet. These simulations acted as traps to capture and study different types of cyber attacks. The goal was to gain a deep understanding of the motives and techniques commonly employed by hackers to compromise servers over the Internet. This knowledge greatly influenced the strategies I developed to assist my clients.

To streamline my efforts and provide enhanced security, I created a software solution specifically designed for my customers. This software integrates seamlessly with a group of servers, functioning as a reverse proxy server or firewall between the DNS server and the customer's server. Named CloudManiak, this automated tool applies my strategies to filter and identify potential cyber attacks. It is important to note that I have developed this software exclusively for my clients and it is not publicly available. I also utilize CloudFlare in conjunction with CloudManiak to provide an additional layer of security.

## Findexer

### Frontend Developer

August 2022 - February 2023 (7 months)

Sweden

www.findex.se - I worked in a startup, focusing exclusively on front-end development to help them quickly launch the first version of their app. My primary responsibilities involved improving their existing framework by implementing a modular architecture and laying the foundation for future development. The team included other experienced developers, and I gained valuable experience working with them, particularly in GIT usage, as everything was managed properly with clear rules. It was a short but very enjoyable adventure.

## KODNET

### Developer

June 2021 - June 2022 (1 year 1 month)

Kristiansand, Agder, Norway

My responsibilities included developing applications from the ground up using Vue, jQuery, and Laravel. I also handled server configuration and

integration with the backend, including advanced implementations that required dependencies stored in a database.

## BiteMyBytes

Co-Founder

January 2014 - June 2022 (8 years 6 months)

Prishtine, Kosovo

Through BiteMyBytes I've realized my private projects, small-sized web apps, and currently, I'm providing only hosting services (Dedicated Servers, KVM VPS Servers) for a fixed number of customers.

## AVIS

Wordpress Developer, Linux System Administrator

November 2014 - May 2022 (7 years 7 months)

Albania

I have worked with Avis, a car rental company in Albania, on customizing their website and hosting. Additionally, I have been responsible for managing their self-hosted mail servers, configuring them, and ensuring their continuous operation.

## ThenX (Chris Heria)

Linux System Administrator

January 2018 - April 2021 (3 years 4 months)

As a System Administrator, I managed the web server infrastructure for the European region, ensuring high availability and reliability. My efforts focused on optimizing server performance to handle thousands of clicks per second, allowing seamless access for visitors at all times. By implementing robust infrastructure solutions, I ensured that the website could support high traffic volumes without failure or downtime.

## Emirates Graphic

Full Stack Developer

September 2019 - July 2020 (11 months)

Dubai, United Arab Emirates

I have re-developed their CMS to speed up the work process in future projects.

I have also dealt with

WordPress plugin creation, Theme customization, and Web Hosting management.

## QAKP Gjon Nikolle Kazazi

Web Developer

September 2017 - April 2018 (8 months)

District of Gjakova, Kosovo

Qakp Gjon Nikolle Kazazi is a professional high school in Gjakova. I assisted them by providing web development and hosting services. My responsibilities included developing their website, customizing their LMS platform, and providing training to teachers on how to use the platform. The contract was short-term and focused solely on delivering these services.

Beetech

Web Developer

February 2013 - June 2016 (3 years 5 months)

Gjakova

I was working part-time on an hourly basis, where my responsibilities involved developing customized front-end websites and integrating them using my custom CMS and WordPress. Additionally, I handled tasks related to mail server configuration and maintenance.

ITMagazina

Web Developer & Publisher

March 2013 - December 2014 (1 year 10 months)

I developed a pilot project called "ITMagazina," which was a technology news portal. Within ITMagazina, I integrated a platform called "How To" ("Si te?" in Albanian). This platform provided students with an opportunity to learn programming using the YouTube API. The "How To" platform had a YouTube Clone design interface.

While the content of the videos, including instructional materials, was managed by a group of developers from Albania, it's important to clarify that the website itself was entirely owned and managed by me.

Point Computers

Computer Technician

September 2013 - November 2013 (3 months)

District of Gjakova, Kosovo

Software maintenance, Hardware maintenance

Cingerr

Web Development Intern

May 2011 - February 2012 (10 months)

Gjakova

In 2011, Cingerr, a company that is now recognized for its high-level hosting services, was primarily focused on website development. During that period, I had the opportunity to be an intern with limited experience. However, I was able to enhance my skills by collaborating with experienced developers at Cingerr. Together, we successfully delivered several websites through our collaborative efforts.
